DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 5 rejected under 35 U.S.C. 102(b) as being anticipated by Mizukami et al., US 6,069,960.

In considering claims 1-2 and 5,

Mizukami discloses a connection device system (Fig 2) wherein the plug determining circuit 8 (Fig 2) first determines whether a plug is connected and if so, a determination as to whether a 3-prong headphone audio connector (containing L,R,G plugs) or whether a 4-prong stereo A/V connector (containing, L,R,V G plugs) is connected. The detection is based upon the impedance value wherein the headphone detection is of the range several tens to several 100 ohms and the A/V connector is around 2.2K ohms. Thus based upon which connector is detected determines the appropriate switching/activation/control for that device.

Allowable Subject Matter

Art Unit: 2622

2. Claims 3-4 and 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure—see newly cited references on attached form PTO-892.
